EDUCATION

University of Washington

Seattle WA

B.A.S. in Applied Computational & Math. Sciences: Data Science

Graduation: Expected December 2025

GPA: 3.55

Relevant Courses: Data Structures & Algorithms, Database Systems, Data Science, Artificial Intelligence, Scientific Computing, Programming 1 & 2, Web Programming, Machine Learning, Software Documentation.

PROFESSIONAL EXPERIENCE

Data Analyst Student Assistant

Seattle, WA

U.W. Medicine: Dermatology Finance Department

06/2024 - CURRENT

- Spearheaded the automation of converting raw data from **Workday Enterprise Data Warehouse** into comprehensive Dashboards for Fiscal analysis for over **70 unique budgets** using Python and SQL.
- Created **SQL queries** used to quickly retrieve budget data. Imported into **Excel using Python**.
- Integrated discrepancy auditor, that checks Legacy Dashboards against new automated dashboards, **increasing accuracy from 72% to 100%**, eliminating over 120 human input errors.
- Iteratively developing **Worker Salary Dashboard** with Fiscal Analyst. Outlined **goals of dashboard, technology requirements** and set **timeline goals**.
- Researched alternative methods for live data viewing, via **PowerBI, Tableau**, and use of **Workday API**.

Bank of America

Seattle, WA

Relationship Banker

04/2022 - 01/2024

- **Discovered client financial needs** during services including wires, notaries, info updates, or troubleshooting client requests in appointment slots. Documented interactions and follow up appointments.
- Set up mobile and online profiles for clients. Emphasizing **key features of Mobile App**. Troubleshooting errors and working to **teach clients self service features**.
- Developed client relationships through outreach and appointment follow-ups **increased my client interactions to over 250%**. Spotless client surveys results, consistently above goals..
- Connecting clients with needs of investments, business products, and loans **surpassing partner referrals YTD by 450%**. Learned a holistic view of financial lives directly from specialists.

PROJECTS

NBA Player Classifier | Python | scikit-learn | data science | Flask | Classification

- Trained Machine Learning models with scikit-learn to identify NBA Player Name using facial recognition showing confidence % and model used. Exported to flask server for users to drop image and find player.

AI Pac-Man Agent | Python | machine learning | artificial intelligence | OOP | Dynamic Programming

- Integrated reinforcement learning, informed search algorithms into UCLA's Pac-Man project. Learned object oriented programming skills by reading through UCLA's documentation.

Delta Flight Query | Python | SQL | API | Logistic Regression | ML

- Built ML to predict flight standby list using logistic regression from data supplied by Delta API. Successfully predicted the best route using stand by allowing for trips to over 5 countries.

Database Systems | SQL | Python | JSON | API | VSCode | DB Browser

- Queried flight data from Bureau of Transportation API. Developed database to store data. Cleaned data using Pandas. Explored data analysis using BigML.

SKILLS

Programming Languages: Python, SQL, Java, R, JavaScript, HTML & CSS

Libraries: Pandas, Pytorch, PyWavelets, TensorFlow, NumPy, scikit-learn, OpenCV, Matplotlib, Flask

IDE's: VisualStudioCode, IntelliJ, Spyder, Jupyter Notebook, jGrasp

Other: BigML, Power BI, Azure, Google Colab, Tableau, Excel

LEADERSHIP: TRIO Peer Mentor | Hispanic/Latino Organization for Leadership & Advancement (HOLA) | Association of Latino Professionals For America (ALPFA) | Residential Community Student Association (RCSA)
